We Aspire to a **GREENER** Tomorrow

ABOUT US

Welcome to ALORD CROP SCIENCE PRIVATE LIMITED, where expertise, integrity, and innovation come together to support the growth of the agrochemical industry. With over a decade of industry experience, we have earned the trust of agrochemical manufacturers, formulators, and fertilizer companies across India by delivering high-quality raw material solutions and dependable supply chain services. As a dedicated B2B partner, we are committed to helping our customers develop superior products while improving operational efficiency and business growth. Our expertise lies in the sourcing, procurement, and distribution of a comprehensive range of agricultural raw materials, including organic fertilizers, agrochemicals, specialty plant nutrients, humic substances, amino acids, seaweed extracts, biostimulants, and plant growth promoters. Every product we supply is carefully selected to meet stringent quality standards and the evolving needs of the agricultural sector. At ALORD CROP SCIENCE PRIVATE LIMITED, we believe that a strong supply chain is the foundation of every successful business. Leveraging our extensive market knowledge, robust sourcing network, and efficient logistics capabilities, we ensure consistent product availability, competitive pricing, and timely deliveries allowing our customers to focus on innovation and market expansion with complete confidence. Our commitment extends beyond supplying raw materials. We strive to build long term strategic partnerships based on trust, transparency, and mutual success. By understanding our clients' unique requirements, we deliver customized sourcing solutions that create lasting value and sustainable growth. Today, we are proud to have established a strong network of 80+ trusted trading partners and to have successfully served 500+ manufacturers across India. These milestones reflect our unwavering commitment to quality, reliability, and customer satisfaction. As we continue to grow, our vision remains clear to become India's most trusted and preferred partner for premium agrochemical and fertilizer raw material solutions, empowering businesses with consistent quality, reliable supply, and exceptional service. ALORD CROP SCIENCE PRIVATE LIMITED Your Trusted Partner in Agricultural Raw Material Solutions.

OUR VISION

Alord vision is to work hard all the time to keep our wide range of bio stimulant in the most preferred and first priority list of our buyers and users.

OUR MISSION

Alord mission is strong and determined The ambition is to become a leader in the Indian fertilizer market by providing premium quality products to farmers and MSME companies, thereby increasing their business profitability and maximizing production and at the same time protecting the earth's resources and environment.

QUALITY

We provide exceptional products and unmatched customer service, delivering premium value and reliable solutions that exceed our clients' expectations.

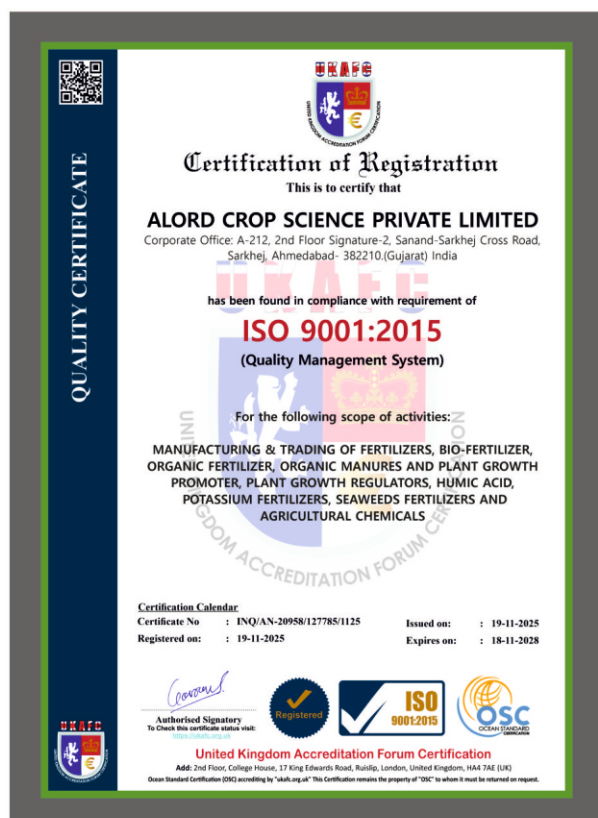

ORGANIC

ACHIEVEMENT CERTIFICATION & COMPLIANCE

We adhere to industry-recognized certifications and strict regulatory standards to ensure quality, safety, consistency, and reliability in every transaction. Our commitment to compliance reflects our dedication to delivering trusted products and maintaining the highest levels of customer satisfaction.

| 12 | CHELATED MICRONUTRIENTS |
| 13 | BORON 20 POWDER |
| 14 | LIQUID SILICONE SPREADER |

HUMIC ACID SHINY FLAKES

Humic Acid is a natural organic soil conditioner derived from organic matter. It improves soil structure, enhances nutrient availability, promotes root development, and increases water retention capacity. Humic Acid helps plants absorb essential nutrients more efficiently, leading to healthier growth, improved crop quality, and higher yields. It also supports beneficial soil microorganisms, making it an essential component for sustainable agriculture and long-term soil fertility.

Packaging Details

25Kg Kraft Paper Bag

HUMIC ACID POWDER

Humic Acid is a natural organic soil conditioner derived from organic matter. It improves soil structure, enhances nutrient availability, promotes root development, and increases water retention capacity. Humic Acid helps plants absorb essential nutrients more efficiently, leading to healthier growth, improved crop quality, and higher yields. It also supports beneficial soil microorganisms, making it an essential component for sustainable agriculture and long-term soil fertility.

Packaging Details

25Kg Kraft Paper Bag

SEAWEED EXTRACT FLAKES

Seaweed Extract Flakes are a natural plant bio-stimulant rich in nutrients, amino acids, vitamins, and natural growth promoters. They enhance root development, improve nutrient uptake, promote vigorous plant growth, and increase flowering, fruit setting, and crop yield. Seaweed Extract Flakes also help plants overcome environmental stress and improve overall crop quality and productivity.

Packaging Details

25Kg Kraft Paper Bag

SEAWEED EXTRACT POWDER

Seaweed Extract Powder is a premium organic bio-stimulant derived from natural seaweed, rich in essential nutrients, amino acids, vitamins, and plant growth promoters. It enhances root growth, improves nutrient absorption, boosts flowering and fruit development, and increases crop yield and quality. Seaweed Extract Powder also helps plants withstand environmental stress, improving overall plant vigor and productivity.

Packaging Details

25Kg Kraft Paper Bag

AMINO ACID 80 POWDER

Amino Acid 80% Powder is a highly concentrated bio-stimulant that promotes vigorous plant growth, enhances nutrient absorption, improves stress tolerance, and increases crop yield and quality.

Packaging Details

25Kg Kraft Paper Bag

FULVIC ACID 80 POWDER

Fulvic Acid is a natural organic bio-stimulant that enhances nutrient uptake, improves soil fertility, and promotes healthy plant growth. It helps plants absorb essential minerals more efficiently, stimulates root development, increases resistance to environmental stress, and supports higher crop yield and quality. Fulvic Acid also improves soil microbial activity, contributing to sustainable and productive agriculture.

Packaging Details

25Kg Kraft Paper Bag

GREEN SEAWEED EXTRACT

Green Seaweed Extract is a natural plant bio-stimulant rich in essential nutrients, amino acids, vitamins, and natural growth hormones. It promotes vigorous root development, enhances plant growth, improves flowering and fruit setting, and increases crop yield and quality. Green Seaweed Extract also helps plants withstand environmental stress and improves overall plant health and productivity.

Packaging Details

25Kg Kraft Paper Drum

ORGANIC CARBON POWDER

Organic Carbon Powder is a natural soil enhancer that improves soil fertility, boosts microbial activity, and enhances nutrient availability. It helps improve soil structure, increases water retention capacity, promotes healthy root development, and supports sustainable crop growth. Regular use of Organic Carbon Powder contributes to higher yields, better soil health, and improved crop quality.

Packaging Details

25Kg Kraft Paper Drum

SODIUM O-NITROPHENOLATE

Sodium Ortho-Nitrophenolate (also called Sodium o-Nitrophenolate) is an organic sodium salt of ortho-nitrophenol, used as a plant growth regulator (PGR). It is commonly included in nitrophenolate-based formulations alongside Sodium Para-Nitrophenolate and Sodium 5-Nitroguaiacolate.

Packaging Details

25Kg Kraft Paper Drum

SODIUM PARA NITROPHENOLATE

Sodium Para-Nitrophenolate (also written as Sodium p-Nitrophenolate or p-Nitrophenol sodium salt) is a phenolic plant growth stimulant. It is typically used in combination with other nitrophenolates (such as Sodium Ortho-Nitrophenolate and Sodium 5-Nitroguaiacolate) in plant bio-stimulant formulations to promote cell division, elongation, and root growth.

Packaging Details

25Kg Kraft Paper Drum

CHELATED ZINC EDTA 12

Chelated Zinc EDTA 12% is a fully water-soluble micronutrient fertilizer used to correct zinc deficiency in crops and support healthy plant growth. Zinc chelated with EDTA ensures maximum stability, availability, and rapid absorption by plants across a wide soil pH range. It plays a vital role in enzyme activation, chlorophyll formation, protein synthesis, and growth hormone production. The product is suitable for foliar spray, soil application, and drip irrigation and is widely used in commercial agriculture and fertilizer formulations. Supplied in 25 kg bags for bulk agricultural use.

Packaging Details

25Kg LDPE Bag

CHELATED MICRONUTRIENTS

Chelated EDTA Mix Micronutrient Fertilizer is a balanced formulation of essential plant micronutrients chelated with EDTA to ensure maximum availability, stability, and rapid absorption. It contains Zinc, Magnesium, Manganese, Iron, Calcium, Boron, Copper, and Molybdenum, which together correct multiple micronutrient deficiencies in crops. This advanced chelated formulation improves nutrient uptake, enhances plant metabolism, boosts crop vigor, and increases yield quality. Suitable for soil application, foliar spray, and drip irrigation, it is ideal for all crops and intensive agricultural practices.

Packaging Details

25Kg LDPE Bag

BORON 20 POWDER

Boron 20% Powder is a highly effective, water-soluble micronutrient fertilizer formulated from Boric Acid to correct boron deficiency in agricultural crops. Boron is essential for cell wall formation, pollen viability, flowering, fruit setting, and efficient sugar transport within plants. This fast-acting formulation ensures rapid absorption through foliar spray, soil application, and fertigation, helping crops overcome common boron deficiency symptoms such as poor flowering, fruit cracking, hollow stems, and reduced yield. Suitable for all crops, Boron 20% Powder improves nutrient utilization efficiency and supports uniform crop growth and higher productivity.

Packaging Details

25Kg LDPE Bag

LIQUID SILICONE SPREADER

Liquid Silicone Spreader is a non-ionic agricultural spray adjuvant used to improve the spreading, sticking, and penetration of pesticides, fungicides, herbicides, and foliar nutrients. It reduces surface tension of spray solution, allowing better coverage on leaf surfaces and improved absorption. Suitable for all crops, it enhances spray efficiency, reduces chemical wastage, and improves overall crop protection results.

Packaging Details

200ltr. HDPE Drum
